

## Vancouver Amateur Winemakers Association 2014 Competition Class Descriptions

Class	Name	Description
<b>C</b>	Dry White Grape	Sugar content in white table wines can vary from uncompromisingly dry (as in Burgundies, Washington or California Chardonnays), to slightly sweet (as in dry German wines), to SG 1.010. Colour is pale straw to light gold, with no amber or brown tinges. Acid 0.5%- 0.8%. Alcohol 9%- 14%. There are no direct entries to this class; the wines have to be entered to one of the (sub)classes (C1-4). The class description above applies to all subclasses unless stated otherwise.
<b>C1</b>	Chardonnay	Wines must contain at least 85% Chardonnay.
<b>C2</b>	Aromatic White	A dry or off-dry white wine that demonstrates a striking perfumed quality. That quality may reflect floral character, fruit character, or both. Typically made as a varietal wine from grapes such as any of the muscats, Bacchus, Ehrenfelser, Gewürztraminer, Malvasia, Optima, Ortega, Pearl of Csaba, Scheurebe, Schönburger, Siegerrebe, Viognier, Riesling and others. Preferred examples will usually have been cold-fermented.
<b>C4</b>	New World Style White	This class contains all other white wines, either varietals or blends that do not fit the definitions of Classes C1 and C2
<b>D</b>	Still Rose Grape	Wines in this class may range in colour from the palest pink to a very light red. Purple tinges are undesirable but an orange tinge is permissible if it is not too pronounced. Sugar may range from completely dry to slightly sweet
<b>E</b>	Dry Red Grape	A red table wine is usually free of residual sugar (under 0.75%), although a well balanced and aged red will have some glycerin and a softness that could be mistaken for "sweetness". Colour may range from light red to garnet, with the tawny edge of a well-matured wine being preferable to the red-purple of a younger wine. Wines should be medium to full bodied, and may be noticeably astringent. Acid 0.4%- 0.6%. Alcohol 11%- 15%. There are no direct entries to this class; the wines have to be entered to one of the (sub)classes (E1-6). The class description above applies to all subclasses unless stated otherwise.
<b>E1</b>	Bordeaux Style	A wine made from the traditional "noble" Bordeaux varietals: Cabernet Sauvignon, Merlot, Cabernet Franc, Petit Verdot, Malbec and Carmenère. Bordeaux Style wines can be blended or 100% varietal.
<b>E2</b>	Pinot Family	Wines must contain at least 85% of one or more of the following varieties: Pinot Noir, Pinot Meunier, or Gamay Noir. Ideally, these wines exhibit fruity attributes and may be at their peak when young. The best mature examples demonstrate complexity and finesse while retaining substantial fruit.
<b>E4</b>	Zinfandel	Wines must contain at least 85% Zinfandel.
<b>E5</b>	Rhone Style	A dry red table wine made from at least 85% of one or more of the following grape varieties: Alicante Bouschet, Carignane, Grenache, Mourvèdre, Petite Syrah (Durif), and Syrah (Shiraz). Blends may also contain any other variety permitted in the Chateauneuf-du-Pape appellation. Note that any other (i.e., non-Rhone) variety or varieties may be used in the remaining 15%.
<b>E6</b>	New World Style Red	This class contains all other red wines, either varietals or blends that do not fit the definitions of Classes E1, E2, E4, or E5. Specifically, wines that contain less than 100% Bordeaux varietals, less than 85% Pinot or Gamay, less than 85% Zinfandel, or less than 85% Rhone varietals belong in this class.
<b>F</b>	Dessert	Wines to be drunk with the dessert course of a meal. Should be sweet and luscious but with sufficient acid (0.7% - 0.85%) to keep them from being cloying, and should not be astringent. Sauternes and sweet late harvest Rieslings are examples. May be grape or fruit. Alcohol should be 10% to 15%, and developed only by fermentation of the wine. These are not fortified wines. (Ports, sherries, madeiras and other fortified wines don't belong in this class - see After Dinner).

<b>G</b>	After Dinner	These wines are for use after dinner, perhaps with nuts or cheese or in place of a liqueur. Ports, sweet sherries, madeiras or other wines that are fortified, baked or otherwise made using port or sherry type methods belong in this class. An appropriate, completely naturally fermented wine such as fig or raisin also belongs here. These wines are invariably sweet (SG 1.025 - 1.050), with alcohol 15% - 20%.
<b>H</b>	Sparkling	There are Sparkling wines appropriate for any occasion, for use with virtually any food. Wines will be judged on initial sparkle and on duration/retention of sparkle. (Pressure of CO2 should be 2 - 5 Atm.) May be grape or fruit, dry or sweet, any colour. Cider is included in this class. Acid 0.6% - 0.8%. Alcohol 9% - 13%. Sparkling wines must not have sediment in the bottle.
<b>I</b>	Social	A wine from either grape or fruit that strikes a happy medium: neither too sweet nor too dry and should not be too high in alcohol. Social wines should have universal appeal and be able to stand on their own without food.
<b>J</b>	Non-Grape	A Non-Grape wine might fit the purpose of any other wine class and would thus have the technical characteristics of that particular class. For example, a port-style wine made from blackberries should otherwise comply with the definition of the After Dinner class. The entrant must specify the intended style.
<b>N</b>	Novice	A wine made by a "Novice Winemaker", i.e., a competitor who has never won an award in any other wine class. Once the competitor has accumulated 12 or more points in one or more VAWA Novice Competitions, he/she also becomes ineligible to enter the Novice Wine Classes. There are no direct entries to this class; the wines have to be entered to one of the (sub)classes (NC - NJ). The definition above applies to all subclasses.
<b>NC</b>	Novice Dry White Grape	A wine which fits the description of any of the C classes, made by a "Novice Winemaker".
<b>NE</b>	Novice Dry Red Grape	A wine which fits the description of any of the E classes, made by a "Novice Winemaker".
<b>NI</b>	Novice Social	A wine which fits the description of the I class, made by a "Novice Winemaker".
<b>NJ</b>	Novice Non-Grape	A wine which fits the description of the J class, made by a "Novice Winemaker".
<b>T</b>	Pale Beer	Colour may be straw to golden, but not amber. Should have good hop aroma, with maltiness in balance with bitterness. Examples: blonde lagers, pale, light and bitter ales.
<b>U</b>	Dark Beer	Colour from amber to dark brown, may have reddish tones. May be dry or slightly sweet, generally smoother, heavier-bodied and more flavourful than pale beers. Examples: dark lagers, brown ales, mild ales, porters.
<b>V</b>	Stout	Dark brown in colour, stout may be dry or sweet. Full flavoured but with a smooth finish. Dry types are usually highly hopped and consequently bitter. Examples: milk stout, Russian stout, Guinness.
